PROFESSIONAL SUMMARY

Computer Science student with hands-on learning experience in Python, data analysis, machine learning, and AI automation. Experienced in data cleaning, exploratory data analysis, data visualization, preprocessing, model training and evaluation. Built learning projects around gaming addiction prediction and AI-powered recruitment workflows using multi-agent systems, RAG, and vector stores. Interested in Data Analysis, Machine Learning, and AI roles.

EDUCATION

Bachelor of Computer Science — Modern Technology & Information University (MTI) Oct 2024 – Jun 2028

Certifications & Courses

Machine Learning Training — National Telecommunication Institute (NTI) 28 June2026 – 23 July2026

- Studied Machine Learning, including data preprocessing, EDA, and visualization.
- Applied classification, clustering, model evaluation, and hyperparameter tuning.
- Worked on a Gaming Addiction prediction project.
- Completed practical training in AI automation with Next.
-

Automation Training — Next Academy 19 July 2026 – 30 July 2026

- Designed a multi-agent recruitment workflow using **n8n**.
- Built AI agents for CV analysis, candidate-job matching, and email communication.
- Used **RAG and Vector Store** for candidate matching and compatibility scoring.
- Implemented an **HR Manager Agent** for human review before final communication.

PROJECTS

Gaming Addiction Prediction — Machine Learning Project

- Prepared and analyzed a binary classification dataset using Python and Pandas.
- Performed data cleaning, EDA, visualization, categorical analysis, and correlation analysis.
- Applied encoding and preprocessing techniques to prepare data for machine learning.
- Built a classification workflow using **addiction binary** as the target variable.

AI Recruitment System — n8n / AI Agents

- Designed a multi-agent recruitment workflow using **n8n**.
- Built AI agents for CV analysis, candidate-job matching, and email communication.
- Used **RAG and Vector Store** for candidate matching and compatibility scoring.
- Implemented an **HR Manager Agent** for human review before final communication.

SKILLS

Technical Skills:

- **Programming:** Python, C++, Java
- **Data Analysis:** Pandas, NumPy, Excel, Power BI
- **Data Visualization:** Matplotlib, Seaborn, Exploratory Data Analysis (EDA)
- **Machine Learning:** Scikit-learn, Classification, Clustering, Neural Networks, Ensemble Methods
- **ML Preprocessing:** Missing Values, Outliers, Encoding, Feature Scaling, Train/Test Split, Grid Search
- **Databases & Data:** SQL, Data Cleaning, Correlation Analysis
- **AI & Automation:** n8n, AI Agents, RAG, Vector Stores, Multi-Agent Workflows
- **Cloud & Data Architecture:** AWS fundamentals, modern data architecture concepts

Language skills

- **Arabic — Native**
- **English — Very Good**
